Professional Summary

Senior Software Engineer with 4 years of experience architecting and delivering scalable full-stack applications across Banking, E-Commerce, and Travel sectors. Expert in MERN stack development with proven ability to lead cross-functional teams and drive technical excellence. Specialized in building secure, high-performance systems serving 50K+ daily active users with measurable business impact through improved development velocity and code quality.

Experience

Senior Software Engineer

Nov 2022 – Present

Pinelabs Pvt. Ltd.

Bengaluru, India

- Led cross-functional team of 5 engineers delivering end-to-end software solutions for Banks, Airlines, Travel, and E-Commerce clients, maintaining 100% on-time project delivery across 10+ production releases.
- Architected modular Node.js backend with RESTful APIs and JWT authentication for e-commerce platform serving 50K+ daily active users with 99.9% uptime.
- Built React-based Admin Panel with RBAC for digital gift card platform, reducing administrative task completion time by 30%.
- Improved development velocity by 20% and reduced production bugs by 25% through code review standards, React.js best practices, and reusable component library.
- Designed B2B corporate gifting platform with Redux state management, MongoDB data persistence, and secure payment gateway integration.

Data Analyst

Jan 2021 – Jan 2022

eClers

Pune, India

- Conducted data research across LinkedIn, D&B Hoovers, and corporate databases, maintaining 10K+ contact records with 25% improved accuracy through automated validation processes.

Technical Skills

Frontend Development: JavaScript (ES6+), React.js, Next.js, Redux.js, Bootstrap, Material-UI (MUI)

Backend Development: Node.js, Express.js, RESTful API Design, Authentication (JWT, OAuth)

Database & ORM: MongoDB, Prisma ORM, Database Design, Query Optimization

Tools & Practices: Git, Agile/Scrum, Code Review, Performance Optimization, Modular Architecture

Key Projects

Digital Gift Card & B2B Corporate Gifting Platform | *React.js, Node.js, MongoDB, Redux, JWTPinelabs Pvt. Ltd.*

- Engineered scalable gift card platform processing 10K+ daily transactions with real-time inventory synchronization and secure payment processing using industry-standard encryption protocols.
- Developed enterprise B2B platform serving 50+ corporate clients with customized branding, approval workflows, and bulk gift card procurement capabilities for employee engagement programs.
- Built modular component architecture following React.js best practices, accelerating feature development by 30% through component reusability and implementing comprehensive error handling.
- Optimized application performance through lazy loading, code splitting, and efficient state management, achieving 40% faster page load times and integrated secure payment gateways with automated reconciliation.
- Implemented role-based dashboards with advanced filtering, search functionality, and detailed analytics for transaction monitoring, user management, and business intelligence reporting.

Education

Full Stack Web Development Bootcamp

Jan 2022 – Oct 2022

Masai School

Intensive 1000+ hour program

Bachelor of Engineering in Mechanical Engineering

2022

Sinhgad College, Savitribai Phule Pune University

GPA: 8.6/10

Certifications & Leadership

Certifications: Node.js, Express, MongoDB Course (Udemy, June 2025)

Leadership: Led 5+ engineering teams, mentored 5 junior developers, conducted 100+ code reviews
